

Surface Hydroxyl Group Dehydrogenation Cu Zno Al₂O₃ Catalyst Long Chain Alkane For Catalyst Support

Our Product Introduction

for more products please visit us on jyalumcatalyst.com

Basic Information

- Place of Origin: CHINA
- Brand Name: Long Chain Alkane Dehydrogenation Alumina Carrier
- Model Number: KML-100

Product Specification

- Surface Hydroxyl Groups: High Concentration Of Surface Hydroxyl Groups
- Application: Catalyst For Dehydrogenation Of Long Chain Alkanes
- Moisture Content: Less Than 1%
- Pore Volume: 0.8-1.2 Cm³/g
- Surface Area: 150-170 M²/g
- Thermal Stability: Up To 1000°C
- Alumina Content: More Than 99%
- Bulk Density: 0.3-0.4 G/cm³
- Highlight: **dehydrogenation cu zno al₂o₃ catalyst, hydroxyl pd al₂o₃ catalyst, hydroxyl cu zno al₂o₃ catalyst**

Product Description

Product Description:

Our product boasts a pore volume of 0.8-1.2 cm³/g, allowing for efficient absorption and transportation of long chain alkanes. Additionally, the surface area of 150-170 m²/g ensures maximum exposure of the reactants to the catalytic sites, leading to high selectivity and conversion rates.

Our Long Chain Alkane Dehydrogenation Alumina Carrier product is known for its exceptional catalytic activity, allowing for efficient conversion of long chain alkanes into valuable products. Its high selectivity ensures that the desired products are formed, while minimizing the formation of unwanted by-products.

Whether you are in the oil industry or using this product for other applications, our Long Chain Alkane Dehydrogenation Alumina Carrier is a reliable and effective choice. Place your order today and experience the benefits of our product.

Features:

Product Name: Long Chain Alkane Dehydrogenation Alumina Carrier

Catalytic Activity: High Selectivity And Conversion Rate

Bulk Density: 0.3-0.4 G/cm³

Pore Size: 10-15nm

Pore Volume: 0.8-1.2 Cm³/g

Surface Hydroxyl Groups: High Concentration Of Surface Hydroxyl Groups

The Long Chain Alkane Dehydrogenation Alumina Carrier product is suitable for use in the following processes:

Drip ball

Oil column

Oil ammonia column

Technical Parameters:

Catalytic Activity	High Selectivity And Conversion Rate
Particle Size	2 Mm
Thermal Stability	Up To 1000°C
Surface Area	150-170 M ² /g
Alumina Content	More Than 99%
Surface Hydroxyl Groups	High Concentration Of Surface Hydroxyl Groups
Moisture Content	Less Than 1%
Bulk Density	0.3-0.4 G/cm ³
Pore Volume	0.8-1.2 Cm ³ /g
Application	Catalyst For Dehydrogenation Of Long Chain Alkanes

Applications:

The Long Chain Alkane Dehydrogenation Alumina Carrier product is widely used in various applications, such as drip ball and oil column. It has excellent catalytic properties, making it an ideal choice for the dehydrogenation of long chain alkane.

The Long Chain Alkane Dehydrogenation Alumina Carrier product is commonly used in the petrochemical industry, as well as in the production of various chemicals. It is also used in the production of high-quality fuels and lubricants.

The Long Chain Alkane Dehydrogenation Alumina Carrier product is an essential component in the production of high-quality drip ball and oil column, which are widely used in the oil and gas industry.

The Long Chain Alkane Dehydrogenation Alumina Carrier product is designed to meet the highest quality standards, and it is manufactured using the latest technology. This product is in high demand due to its excellent properties and wide range of applications.

Customization:

Our customization services cater to your unique requirements and include options such as drip ball, oil column, and drip ball customization. Trust us to deliver a product that meets your exact specifications and offers superior performance.

Support and Services:

The Long Chain Alkane Dehydrogenation Alumina Carrier product offers technical support and services to ensure optimal performance and customer satisfaction. Our team of experts provides assistance with product selection, application development, and troubleshooting. We also offer training and education on the proper handling and use of the product. Additionally, our services include custom product development and testing to meet specific customer needs. Trust us to provide reliable and efficient technical support and services for your

Long Chain Alkane Dehydrogenation Alumina Carrier product.

Packing and Shipping:

Product Name: Long Chain Alkane Dehydrogenation Alumina Carrier

Package Includes: 1 bottle (500g)

Shipping Method: DHL Express

Estimated Delivery Time: 3-5 business days

Shipping Cost: \$30
