

Stable 2-Ethylanthraquinone Hydrogenation Catalyst H₂ With Density 0.55 G/cm³ Insoluble In Water

Our Product Introduction

for more products please visit us on jyalumcatalyst.com

Basic Information

- Place of Origin: CHINA
- Brand Name: 2-ethylanthraquinone hydrogenation catalyst
- Model Number: KME-100

Product Specification

- Storage: Store In Dry Place
- Solubility: Insoluble In Water
- Application: Catalyst For 2-ethylanthraquinone Hydrogenation Reactions
- Purity: $\geq 98\%$
- Density: 0.55 G/cm³
- Shelf Life: 2 Years
- Highlight: **stable 2-ethylanthraquinone hydrogenation catalyst**
, stable catalyst h₂,
2-ethylanthraquinone catalyst h₂

Product Description

Technical Parameters:

Product Attribute	Value
Product Name	Hydrogenation Catalyst for 2-Ethylantraquinone
Chemical Formula	Palladium
Solubility	Insoluble in water
Density	0.55 G/cm3
Purity	≥ 98%
Storage	Store in dry place
Shelf Life	2 years
Application	Catalyst for 2-ethylantraquinone hydrogenation reactions

Applications:

The 2-ethylantraquinone hydrogenation catalyst is especially useful in the oil ammonia column, where it helps to reduce the unsaturated hydrocarbons present in the feedstock. This process is crucial in the production of high-quality products, such as diesel, gasoline, and jet fuel. The use of this catalyst ensures that the final products meet the industry standards for quality and safety.

The KME-100 catalyst is also used in the hydrogenation of aromatics and other compounds, making it a versatile product that can be used in different scenarios. It is ideal for applications that require high selectivity and productivity, and it is highly effective in reducing the formation of by-products.

Overall, the 2-ethylantraquinone hydrogenation catalyst is an essential component in the oil ammonia column and other hydrogenation applications. Its high purity and effectiveness make it a preferred choice for many industrial processes. If you are looking for a reliable and efficient catalyst for your hydrogenation needs, then the KME-100 catalyst is an excellent choice.

Support and Services:

The 2-Ethylantraquinone Hydrogenation Catalyst is a high-performance catalyst that is specifically designed for use in the production of Hydrogen Peroxide. It is available in various formulations to meet the specific needs of our customers. Our team of experts offers technical support and services to help our customers optimize the performance of the catalyst and to troubleshoot any issues that may arise during its use. Our services include:

Catalyst selection and optimization

Process optimization

Performance monitoring and analysis

Troubleshooting and problem-solving

Training and education

Our goal is to provide our customers with the highest level of technical support and services to ensure the success of their operations.

Packing and Shipping:

Product Name: 2-Ethylantraquinone Hydrogenation Catalyst

Product Weight: 1 kg

Package Dimensions: 10 x 10 x 10 cm

Shipping Method: Standard Shipping

Estimated Delivery Time: 5-7 business days

Shipping Cost: \$25.00
